

# CG-3000 CTU CONTROL UNIT

## INTRODUCTION

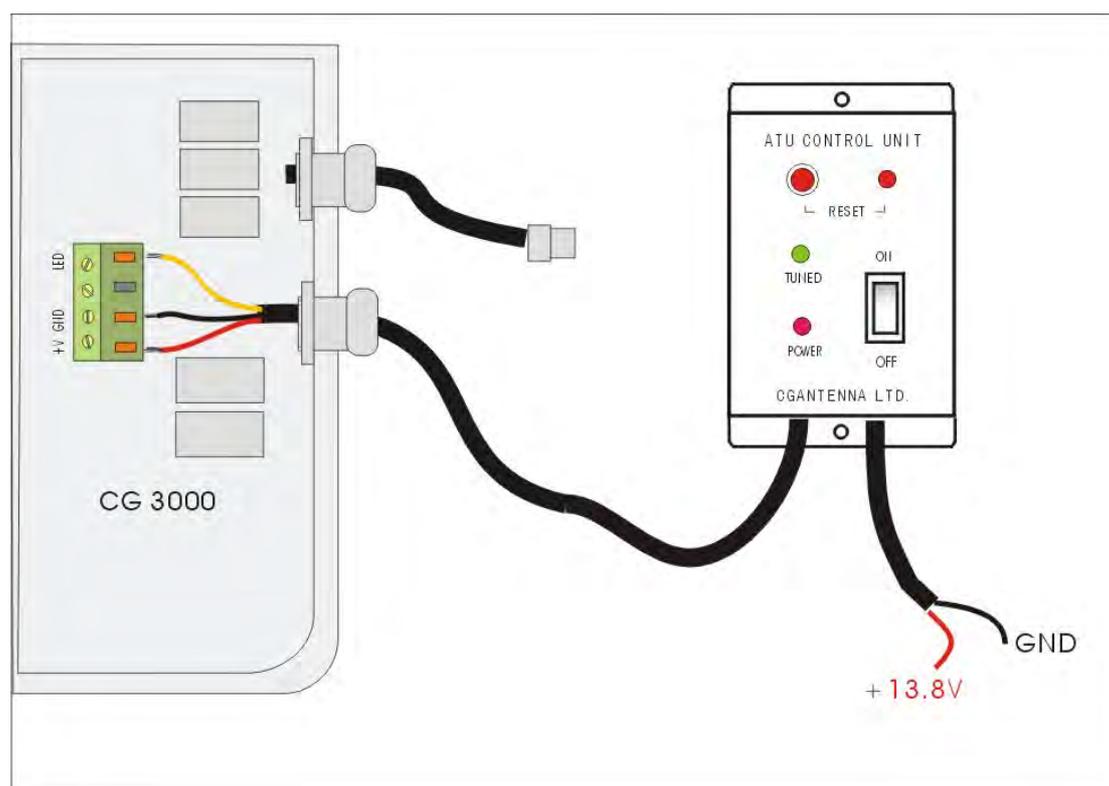

CG-3000 CTU is a control unit for **CG-3000** or **CG-5000** automatic antenna tuner. It's a must have accessory for your prestige **CG-3000** or **CG-5000** tuner. With it, you can easily control the power supply to your tuner, resetting the tuner, monitoring the tuning status.

## USING CONTROL UNIT

### Installation

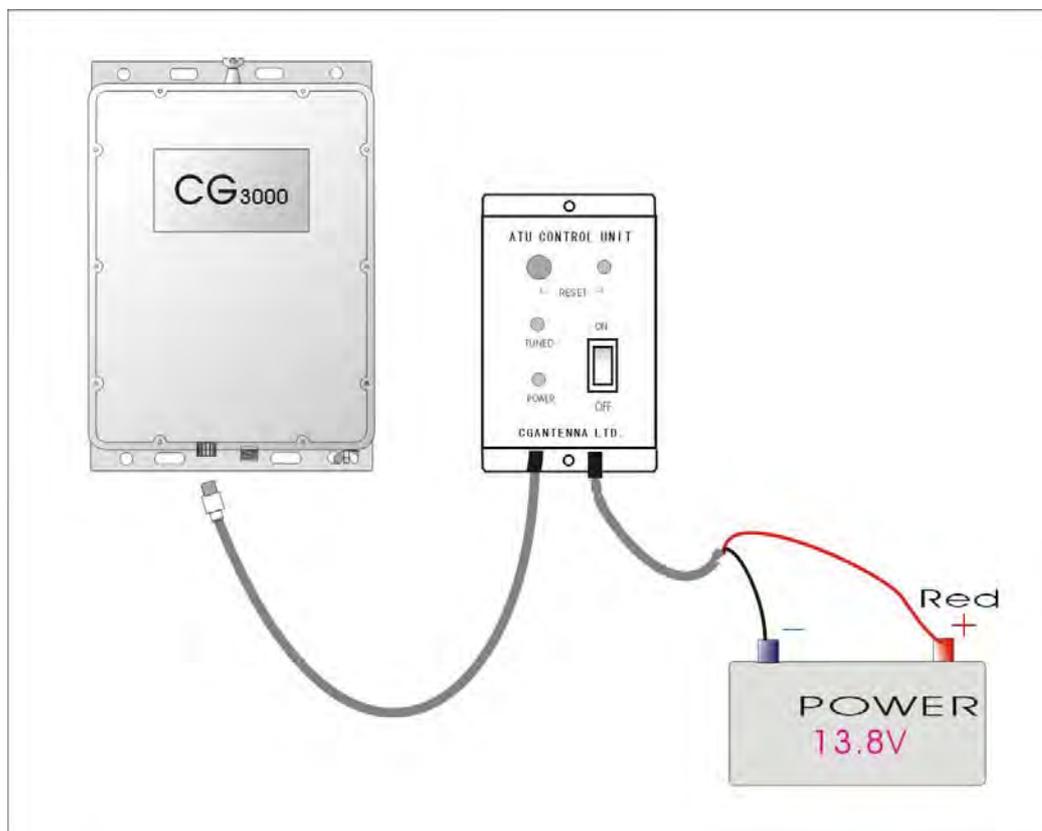

#### **Model: 10 meters control cable with 3 wires**

1. Open the cover of **CG-3000** tuner.
2. Screw off the original 2 wires power cable from the socket.
3. Remove the cable.
4. Place the 3 wires power cable from **CG-3000** CTU into the tuner.
5. Yellow wire should be connected to LED socket. Red wire should be connected to GND socket. Red wire should be connected to +V. Screw tightly.
6. Close the tuner.
7. Connect the supplied 2 wires power cable to 13.8V DC source. The red wire must be connected to the positive of DC source. The black wire must be connected to the negative of DC source.

**Model: 10 meters control cable with connector**

Just directly connect the cable to CG-3000 or CG-5000 tuner's socket.

**Operation****ON/OFF** switch

It is used to control the power supply to the tuner.

**POWER** indicator

This indicator turns to red when control unit starts to supply power to tuner.

**TUNED** indicator

After tuner finishes tuning and lock the frequency, it will reply back the signal to control unit. Then this indicator will grow green.

**RESET** knob

Pressing this knob sends the signal to **CG-3000** tuner to reset system.

**RESET** indicator

This indicator will grow yellow when tuner resets.

## **WARRANTY**

CG antenna warrants all products against defects in material for a period of **ONE** year unless otherwise indicated.

The warranty does not cover damage, improper use, abuse, or conditions beyond our control (i.e. lightning).

## **REPAIRS**

If you have any problem of your CG product, please contact your local sales directly. Then we can arrange the repair service.

If return for repair is needed, please wrap and pack your unit well to protect damage during transportation or handling. Include a note with your name, address, phone number, email and brief description of the problem.
